Standing at the 14th release from Mac OS, Mac-OS 10 13 High Sierra is the desktop operating system or software for MacIntosh computers.. Here's how it works. Safari 11 includes a new feature called Settings for This Website that lets you configure a range of settings and options on a site-by-site basis.

13 Mac-OS: 1 Sep 14, 2017 This now changes in Safari 11, which will be released as part of macOS High Sierra on September 25, 2017.. Having some of the fine benefits of using High Sierra, the following are some of the features present in this system as the top 10 best options of 10.
